## What's New in Colors and Materials?

### Teragren Bamboo Surfaces

Teragren's bamboo countertops are a beautiful and durable alternative to traditional hardwoods for counters, kitchen islands and table tops. Manufactured to exacting standards for quality and environmental safety, these furniture-grade products are made with rapidly renewable Optimum 5.5 Moso bamboo, a naturally bacteria-resistant material. They are available unfinished or prefinished with a food-safe mineral oil/beeswax finish.
