### Bamboo Flooring from Teragren

By Evelyn Royer

Teragren

The wide-plank Portfolio Strand bamboo floating floor collection is made with rapidly renewable bamboo fused together with an environmentally safe adhesive. On average, the floors are 154 percent harder than red oak and 125 percent harder than North American maple, the company says, and are easy to install with the 2G fold-down locking system. The floors come with micro-bevel edges and ends and a seven-coat aluminum oxide/polyurethane finish. The FloorScore-certified Portfolio collection is available in 10 colors (Paris black is shown here) and a variety of textures and patterns, including two hand-scraped versions. 202-799-5747 - [www.teragren.com](http://www.teragren.com).
