## Teragren Synergy Bamboo Floors

By: Kimberly R. Griffin

The **Synergy** Strand Bamboo Floating Floor by **Teragren** features a Välinge-patented glueless, self-locking system. Available in four colors (wheat, chestnut, java, and brindle), Synergy flooring consists of bamboo strands fused together with an earth-friendly adhesive and cut into 7-11/16" by 72" planks. According to the manufacturer, Synergy floors are extremely durable—150% harder than red oak and 125% harder than North American maple—and suitable for installation in both high-traffic and below-grade areas.
