### **Just Beachy**

Alison leads an active life and likes her home to be a relaxing retreat. She has done a lot of work in the four years since she purchased her mid-century home, and is now ready to tackle the final frontier - her extremely cramped and extremely pink basement bathroom. Matt and Alison get started with lots of demo, some wood slat walls, a marble shower surround and finish the room with wooden tile, a home-made vanity and Matt's first splatter-paint work of art!
